

Order Manager for Magento 2

Note: These instructions apply to installing an extension downloaded from the Fooman website only. If you downloaded the extension from the Magento Marketplace, follow [these installation instructions](#) instead.

Option 1: Preferred Installation Method (Fooman-Hosted Repository)

Fooman will host your extension and will automatically push new extension updates to your repository, ready for you to pull/update in the future.

The advantages of this approach are:

- Saves time installing
- Saves time on installing future extension updates (you don't need to manually download these from the Fooman website and repeat the installation process each time)
- Helps to avoid common errors some people make when using the manual installation method
- It integrates better with a multi-stage deployment process

New extension updates will be pushed automatically to this repository for as long as your support/update period is valid.

1. Log into your account on the [Fooman website](#), using your login details you signed up with. On your [My Extensions](#) page you will see a custom command line. Copy the command line:

Magento 2 Extension Installation

Command for setting up Fooman Hosted Installation Method

example.com

Copy and paste the below command and run it from your Magento 2 root directory as the first step of your installation process (all lines are part of the same command):

```
composer config repositories.fooman composer https://customer-repos.fooman.co.nz/example.com-440cc27e232e6490a6ab27d1565928358a40bb9d
```

VIEW

COPY

2. From a command line in your Magento root folder run

1. [The custom command line you copied from your Fooman Account dashboard]
2. `composer require fooman/ordermanager-m2:^8.0`
3. `bin/magento module:enable --clear-static-content Fooman_OrderManager`
4. `bin/magento setup:upgrade`

If you are using Production Mode please also run

5. `bin/magento setup:static-content:deploy`
6. `bin/magento setup:di:compile`

In the above example, line 1 would look like this:

1. `composer config repositories.fooman composer https://customer-repos.fooman.co.nz/www.example.com-1a5a588b88a32a6826080639160f153214628055`

Option 2: Manual Installation Method (Self-Hosted Repository)

1. Unzip the zip bundle file you downloaded from our store and place the individual zip files into the following folder (please create this folder if it's not already present):

MAGENTO_ROOT/vendor/fooman/packages

▼ vendor	28 items	Folder	Mar 2
▶ bin	10 items	Folder	Dec 6 2015
▶ braintree	1 item	Folder	Dec 6 2015
▶ composer	10 items	Folder	Dec 6 2015
▶ doctrine	1 item	Folder	Dec 6 2015
▶ fabpot	2 items	Folder	Dec 6 2015
▼ fooman	1 item	Folder	21:20
▼ packages	3 items	Folder	21:20
Fooman_OrderManager.zip	62.9 kB	Archive	Feb 22

2. From a command line in your Magento root folder run

1. `composer config repositories.foomanartifact artifact $(pwd)/vendor/fooman/packages`
2. `composer require fooman/ordermanager-m2:^8.0`
3. `bin/magento module:enable --clear-static-content Fooman_OrderManager`
4. `bin/magento setup:upgrade`

If you are using Production Mode please also run

5. `bin/magento setup:static-content:deploy`
6. `bin/magento setup:di:compile`

Uninstalling Order Manager (M2)

From a command line in the Magento root folder run:

```
bin/magento module:disable Fooman_OrderManager
bin/magento setup:upgrade
composer remove --update-with-dependencies fooman/ordermanager-m2
```

If you have used the Manual Installation Method (Option 2), then please delete the following files if they exist.

```
rm vendor/fooman/packages/Fooman_OrderManager*.zip
```

Columns not showing on the Order Overview Screen

If you can't see the columns you want on the Order Overview Screen, enable them by clicking the relevant checkbox under "Columns".

The screenshot shows the Magento 2 'Orders' overview screen. A sidebar on the left contains navigation links for Dashboard, Sales, Products, Customers, Marketing, and Stores. The main content area has a search bar, a 'Create New Order' button, and a table of orders. A modal window titled 'Columns' is open, showing a list of 11 out of 21 visible columns. The columns are organized into three columns, and the 'Tracking Number' and 'Tracking Carrier' checkboxes are highlighted with a red box. The table below the modal shows the first few rows of the order list.
