

Product Fees for Magento 2

Note: These instructions apply to installing an extension downloaded from the Fooman website only.

Option 1: Preferred Installation Method (Fooman-Hosted Repository)

Fooman will host your extension and will automatically push new extension updates to your repository, ready for you to pull/update in the future.

The advantages of this approach are:

- Saves time installing
- Saves time on installing future extension updates (you don't need to manually download these from the Fooman website and repeat the installation process each time)
- Helps to avoid common errors some people make when using the manual installation method
- It integrates better with a multi-stage deployment process

New extension updates will be pushed automatically to this repository for as long as your support/update period is valid.

1. Log into your account on the [Fooman website](#), using your login details you signed up with. On your [My Extensions](#) page you will see a custom command line. Copy the command line:

Magento 2 Extension Installation

Command for setting up Fooman Hosted Installation Method

example.com

Copy and paste the below command and run it from your Magento 2 root directory as the first step of your installation process (all lines are part of the same command):

```
composer config repositories.fooan composer https://customer-repos.fooan.co.nz/example.com-440cc27e232e6490a6ab27d1565928358a40bb9d
```

VIEW

COPY

2. From a command line in your Magento root folder run

1. [The custom command line you copied from your Fooman Account dashboard]
2. `composer require fooman/product-fees-m2`
3. `bin/magento module:enable --clear-static-content Fooman_Totals Fooman_Surcharge Fooman_ProductFees`
4. `bin/magento setup:upgrade`

If you are using Production Mode please also run

5. `bin/magento setup:static-content:deploy`
6. `bin/magento setup:di:compile`

In the above example, line 1 would look like this:

1. `composer config repositories.fooman composer https://customer-repos.fooman.co.nz/www.example.com-1a5a588b88a32a6826080639160f153214628055`

Option 2: Manual Installation Method (Self-Hosted Repository)

1. Unzip the zip file you downloaded from our store into the following folder (please create this folder if it's not already present):

MAGENTO_ROOT/vendor/fooman/packages

▼ vendor	28 items	Folder	Mar 2
▶ bin	10 items	Folder	Dec 6 2015
▶ braintree	1 item	Folder	Dec 6 2015
▶ composer	10 items	Folder	Dec 6 2015
▶ doctrine	1 item	Folder	Dec 6 2015
▶ fabpot	2 items	Folder	Dec 6 2015
▼ fooman	1 item	Folder	21:20
▼ packages	3 items	Folder	21:20
Fooman_Totals-x.y.z.zip	62.9 kB	Archive	Feb 22
Fooman_Surcharge-x.y.z.zip	100.8 kB	Archive	Feb 22
Fooman_SurchargePayment-x.y.z.zip	26.6 kB	Archive	Jan 21

2. From a command line in your Magento root folder run

1. `composer config repositories.foomanartifact artifact $(pwd)/vendor/fooman/packages`
2. `composer require fooman/product-fees-m2`
3. `bin/magento module:enable --clear-static-content Fooman_Totals Fooman_Surcharge Fooman_ProductFees`
4. `bin/magento setup:upgrade`

If you are using Production Mode please also run

5. `bin/magento setup:static-content:deploy`
6. `bin/magento setup:di:compile`

Reporting Any Issues/Bugs

We are proud of our quality extension code - it's been widely tested and we stand by it 100%. If something does happen and you think you might be experiencing an issue or bug, please contact us via support@fooman.co.nz and we will help you out.
